Dear KATUNGI JOASH,

An **ioTec Pay** account has been successfully created for your business VISALAB ASSOCIATES LIMITED.

If you wish to integrate directly with our API, here are your credentials:

- **Client ID:** `pay-019ff0d3-f245-7161-91e5-40ba117ffd17`
- **Client Secret:** `IO-y57nvpNEnAE1EqD9Co2sRuzarvK0PYXE0`
- **Grant Type:** `client_credentials`

A **test wallet** has been set up for you for testing purposes only (not for real transactions):

- **Wallet Name:** VISALAB ASSOCIATES LIMITED TEST
- **Wallet ID:** 019ff0d3-f29c-709e-923e-9792feb552d9

You can use this wallet to simulate collections and disbursements using our **test number (0111777777)** to explore the platform's functionality.
Important: Please keep your API credentials **confidential**. Sharing them could compromise your account security.

To move to production and obtain a **live** wallet, simply upload your **business KYC documents**. Once verified, our admin team will approve and create your **live wallet** so you can start real transactions.

You may also invite your team members to join your ioTec Pay account.

If you need any help or have questions during setup, our team is available to support you every step of the way.

Thank you for choosing ioTec!

Yours sincerely,
ioTec Support
